Pair Programming

TDD / OOP

Areas Of Focus

React

UX/UI

Accessibility

Interactive Web Design

Micro-Interactions

CSS/SASS

ABOUT

I am a software developer with a passion for creative problem solving coupled with visual aesthetics. I have an interest in interactive web design from micro-interactions to big picture UX/UI. I thrive in a fast-paced learning environment, where I am continually challenged while also contributing at a high level towards the task at hand.

CODE

Palette Picker || [GH Repo FE](#) - [GH Repo BE](#) --- [Heroku Deployment](#)

Palette Picker is an app meant to create color palettes that can be saved and stored within projects. Each color in a palette can be locked and unlocked. This is the first project where we created both the back-end and front-end functionality.

Market2Table || [GH Repo](#) --- [Heroku Deployment](#)

Market2Table is an app that assists in connecting local farmers with their community. The app allows users to search for markets and see vendors for specific markets. Vendors can create an account giving them access to personalize a vendor page that is linked to the markets they are vendors at.

Rancid Tomatillos || [GH Repo](#) --- [Heroku Deployment](#)

Rancid Tomatillos is movie rating site that pulls from a current movies API. A user is able to visit the site and see all movies and their average rating and information. A user is able to see personal ratings along with the ability to delete and add ratings.
